RE: **RECOMMENDATION FOR MASE MEDICAL CENTRE LIMITED**

I hereby recommend the above Medical Centre LTD that operates in Kamuli district and it has been in existence since 2013 up to date they have been treating our people well as per the professional code of conduct and its Health Centre II being run as per ministry of health and they are very cooperative and reports on time their work at the district and would wish to partner with CSYAN Health Advancement Program (CHAP) whose global goal is to promote health and wellness through our Health Promotion and Access to Healthcare initiatives. Specifically, they aim to;

Health Promotion: Promote the health of populations by consistently advocating for:

Food Security: Improving and monitoring the nutritional contents of the food produced, ensuring the safety and wholesomeness of the food available in the market. Healthy lifestyle initiatives to improve health.

Access to Healthcare: Improving access to healthcare through programs like Community Health outreach for vulnerable communities, ensuring that everyone has access to quality healthcare services.

Therefore, I recommend Mase Medical Centre LTD to go ahead with partnership following the good goals and objective and we pledge full support as Kamuli district local government on

1. Health Campaigns: Organize joint health campaigns to raise awareness about prevalent health issues, promote healthy lifestyles, and provide free or subsidized health screenings.
2. International Health Days: Celebrate international health days (e.g., World Health

Day, World Cancer Day) by hosting events, workshops, or seminars to educate the community on specific health topics.

3. Community Outreach Programs: Develop and implement community outreach programs to reach vulnerable populations, such as the elderly, children, and low-income families.

4. Health Education and Awareness: Collaborate on health education and awareness initiatives, including workshops, lectures, and social media campaigns.

5. Research and Data Sharing: Explore opportunities for research collaborations and data sharing to improve health outcomes and inform policy decisions.

Other potential areas of collaboration could include:

- Hosting medical camps or health fairs
- Providing health education and counseling services
- Developing and implementing disease prevention and management programs
- Supporting health-related research project

Any assistance rendered to Mase Medical Centre LTD is highly appreciated

Thanks

Mitala Moses
