

The poster features a photograph of four smiling women in traditional African headwraps and beaded necklaces. To the right, logos for CSAYN, CYA, and IICA are displayed. The main text reads: 'Women in Agriculture for sustainable Africa (WASA), a flagship program of Climate Smart Agriculture Youth Network Global (GCSAYN) is pleased to invite you to the onboarding program for our new members. Onboarding program for our new members with main objective to Empower the Girl Child and Women in Sustainable Agriculture as Enablers to Foster the Empowerment of People and Ensuring A Resilient Planet.' Below this, the event details are listed: 'Date: Thursday 6th March 2025', 'Time: 3pm WAT', and 'Venue: Zoom'. A section titled 'Continental Hubs' shows logos for various African countries including Nigeria, Kenya, Ghana, and others. The poster is framed with a green border on the left and right sides.

Women in Agriculture for Sustainable Africa (WASA) Onboarding Program

On March 6, 2025, WASA’s leadership team welcomed new members and shared the organization’s mission, objectives, and strategic priorities.

Key Messages from WASA's Leadership Team

Chinenye Juliet Ejezie

WASA creates a community for young girls and women to motivate and learn from one another. We offer mentorship, expertise sharing and opportunities for growth, promoting inclusive and sustainable agriculture practices in our communities.

Dr. Temple Nneamaka Nwankwor

One of our goals is to reduce unemployment rates in our local communities. We mentor the young girls and women to become agripreneurs, promoting agriculture as a viable career path.

Mr. Divine Ntiokam

Women are Powerful! When you empower one woman, she empowers her children, her family and the entire community. This is why I decided to set up WASA. To all the young girls and women making remarkable impact in their communities, keep doing what you are doing! The efforts you put in today will pave a way for a brighter and sustainable future.

Dr. Wangila Phanice

Women are the backbone of Agriculture and it is essential we support them in implementing environmentally friendly practices. Youth, including young girls are crucial in this effort because they are proactive, innovative and have the potential to drive significant progress towards achieving the SDGs.

Manka Stella

WASA will bring together both the skilled and the unskilled women who may not have had any knowledge in sustainable agriculture and empower them through trainings to become successful agripreneurs.
