SOIL SCIENCE CLUB
SHORT ACTIVITY REPORT

Reporting institution	University of The Gambia School of Agriculture & Environmental Sciences
Date of activity	10 th September ,2026
Activity	Official launch of soil Science Club
Participants	Undergraduate students, student Leaders and Lecturers
Lead facilitator	Dr Sagarr AF Jallow

Executive Summary

The University resumed in the first week of September 2026. On the 10th of September, we held our first inception meeting. During the inception, Dr Sagarr AF Jallow introduced the club to the students and staff.

Many of them were very interested in joining the club. We agreed to have our second meeting at the end of September, and this will allow the students to settle down. A practical on physical properties and compost making will done in the first week of October, 2026

Objective of meeting

- To lunch the soil science club
- To explain to the students about the main objectives of the club

Official Launching of the Club

The launch was attended by both continuing, and fresh students, and as well as a few lecturers. Dr Sagarr AF Jallow gave a brief explanation of the club's objectives and action plan, and the Soil Science Club was officially launched in the school.

Figure1: photos during the lunching of the club

Number of Participants

We had fifty (50) participants during the launching, and these included students and Lecturers

Key achievements and observations

As the club is new, our key achievements are mobilizing and attracting students within a short period of time.

Challenges encountered

So far we have not encounter much challenge

Support or resources needed

We need some financial support to run and provide basic materials for practical

Acknowledgements

We appreciate the support of the Dean of the School, Professor Lamin KM Fatty, faculty Members, and the students for their cooperation.

Note:

Apparently, we have not completed any project, but during our inception meeting, we agreed to

have a practical on Quick Compost Preparation for Vegetables and Fruits Production in the first week of October, 2026
